## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see Remarks (pages 12-13), filed 12/12/2006, with respect to claims 1, 4, 5, 7-11, 17, and 18 have been fully considered and are persuasive. The rejection of claims 4, 5, 7-11, 17, and 18 has been withdrawn.

### ***Allowable Subject Matter***

2. Claims 1, 2, 4, 5, 7-11, 14-17, and 19-26 are allowed.

3. The following is an examiner's statement of reasons for allowance:

\* Some rejected claims have been cancelled to place the application in allowance condition;

\* The present invention provides a new system for retrieving an image from an image database, which can easily render image data of an image database, retrieve information related to the image such as the image itself, image data thereof, information of image processing of the image in a simple and rapid way and is advantageously utilized in an image processing apparatus such as a photographic printing system or the like (see specification, page 4, last paragraph).

Particularly, the new system comprises the following features, which the prior art taken either singly or in combination does not teach:

- wherein said retrieval device performs retrieval of said image using said compressed image data after said compressed image data of said split images in

Art Unit: 2624

regions which are in point symmetry relation with each other about the center of said image are added (see independent claims 1, 15, and 16);

- wherein said compression device performs normalization for correcting fluctuation of said image data in reading to perform setup of said image data to achieve a predetermined reference value of the compressed image data; wherein said fluctuation of said image data is due to at least one of (i) changes of light when scanning said image, (ii) changes in reading positions when scanning said image, (iii) changes in a physical condition or reading position of a photographic print when scanning the photographic print, or (iv) changes in said image data made by altering image data from a digital camera (see independent claims 19 and 23).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
